## SPECIFICATIONS

Model	BX-80N (standard)
Coverage	24m (12m on each side)
Detection zones	4 zones (2 zones on each side)
Sensitivity	2.0˚C at 0.6m/sec.
Detectable speed	0.3m ~ 1.5m/s
Power supply	10 ~ 28 VDC
Current consumption	38mA (max.)
Alarm period	2 ± 1 sec.
Alarm output	2 relay outputs N.O. and N.C. 28 V DC 0.2A (max.) each
Tamper switch	N.C. opens when cover removed
Warm-up period	Approx. 45 sec. (LED blinks)
Volume of audible alarm	Approx. 70dB (at 1 meter distance)
LED indicator	LED is blinking during warm-up period
	Alarm condition
Operating temperature	-20˚C to +50˚C
Environmental humidity	95% max.
RF interference	No Alarm 20V/m
Mounting height	0.8m - 1.2m
Mounting	Wall
Weight	400g
Weatherproof	IP55

Model	BX-80NR (battery operated)
Coverage	24m (12m on each side)
Detection zones	4 zones (2 zones on each side)
Sensitivity	2.0˚C at 0.6m/sec.
Detectable speed	0.3m ~ 1.5m/s
Power supply	3 ~ 9VDC lithium or alkaline battery
Current consumption	3mA(Walktest, LED on)
	15uA(Standby)
Alarm period	2 ± 1 sec.
Alarm output	Form C-Solid state switch: 10V DC 0.01A (max.)
Battery saving time	Approx. 120 sec. or 5 sec.
Tamper swith	Form C opens when cover removed
Warm-up period	Approx. 2 min.
LED indicator	Disable during normal operation
	Enable during walktest or LED switch on
Operating temperature	-20˚C ~ +50˚C
Environmental humidity	95% max.
RF interference	No Alarm 20V/m
Mounting height	0.8m - 1.2m
Mounting	Wall
Weight	520g
Weatherproof	IP55

BX-80NR (battery operated)

56 (2.20) · 128 (5.04) · 60 (2.36) · 235 (9.25) · Mounting Pitch 83.5 (3.28) · 56 (2.20)
Dimensions:mm (inches)
OPTIONS

SP-2

Spacer unitFor
• BX-80N

SP-2 can be used to prevent obstacles such as bay windows and troughs, etc. from being included in the detection area.

60mm

BA-1W

Multi angle wall mount bracket
For
• BX-80N*
• BX-80NR

*SP-2 spacer is required when BA-1W is used.

60˚

• BX-80N with SP-2 & BA-1W
• BX-80NR with BA-1W

IDS INHEP DIGITAL SECURITY

OPTEX

OUTDOOR PIR DETECTOR FOR BOUNDARY OF THE BUILDING

BX-80N/80NR

(standard model)   (battery operated model)

NEW BX-80NR BATTERY OPERATED MODEL

BX-80N/80NR is an advanced PIR detector which is designed to protect the immediate perimeter of the building.
It is developed for the purpose of "EARLY WARNING" i.e. before an intruder breaks into the premises.

BX-80N/80NR enhances protection capabilities

OUTDOOR PIR DETECTOR FOR BOUNDARY OF THE BUILDING
BX-80N (standard model)
BX-80NR (battery operated model)

When a general–purpose mechanical security system is installed, detectors are usually located inside a building. In order to increase the effectiveness of such a security system, Optex recommends not only securing the inside of the building but also adding protection to the outside areas.

By adding BX-80N/80NR, it detects intruders before entry. This invisible barrier offers the first line of defense to a property's boundary.

INDOOR PROTECTION

MIDDLE AREA PROTECTION

BOUNDARY PROTECTION

PERIMETER PROTECTION
Unique detection range for immediate perimeter of the building
Optex's advanced PIR technology creates a narrow, 24m long detection area that protects wide horizontal areas, such as a building's perimeter.
Limited detection range function
The detection range of the BX-80N/80NR can be adjusted to avoid detecting unwanted objects.

Size judging function
The BX-80N/80NR only triggers alarms when both upper and lower detection layers detect movements.

When only the lower zone detects a moving object, the unit is not activated.

When only the upper zone detects a moving objects, the unit is not activated.

When both the upper and lower zones detect a moving object, the unit is activated.

Reduce false alarms caused by unwanted light and RFI sources
Patented Double Conductive Shielding Technology helps to reduce false alarms caused by car headlights and reflected sunlight in particular.

Infrared Rays
Pyro Electric Element
Double Shielding
Advanced temperature compensation
The BX-80N/80NR uses advanced temperature compensation to automatically increase the detector's sensitivity under high temperature conditions, especially where the background temperature ranges from 35 –37 degree C, close to that of the human body.

Sensitivity
Temperature compensation sensitivity of Optex detectors
Ambient temperature (°C)

BX-80NR

Battery operated unit gives convenient & simple installation
■ Save installation time and cost
The BX-80NR is a battery operated model and therefore requires no complicated wiring. It saves installation time and cost.

■ Easily adds on to the existing wireless security system
The BX-80NR with flexible features can be added on to any wireless system which has already been installed. In addition, this unit is effective with transmitters and receivers from all manufactures.

Advanced battery lead aids shared battery power
■ The BX-80NR can be powered by battery of transmitter
By using for the attached battery lead, the battery power from transmitter can be shared with BX-80NR and also low battery signal can be monitored by control panel.
